

B

Downloading and piecing together all of the pattern pieces

A. Print out all of the pattern pages onto separate sheets of A4 paper. The individual pattern templates are too large to print on a single sheet of A4 paper. See the instructions below on how to piece them together.

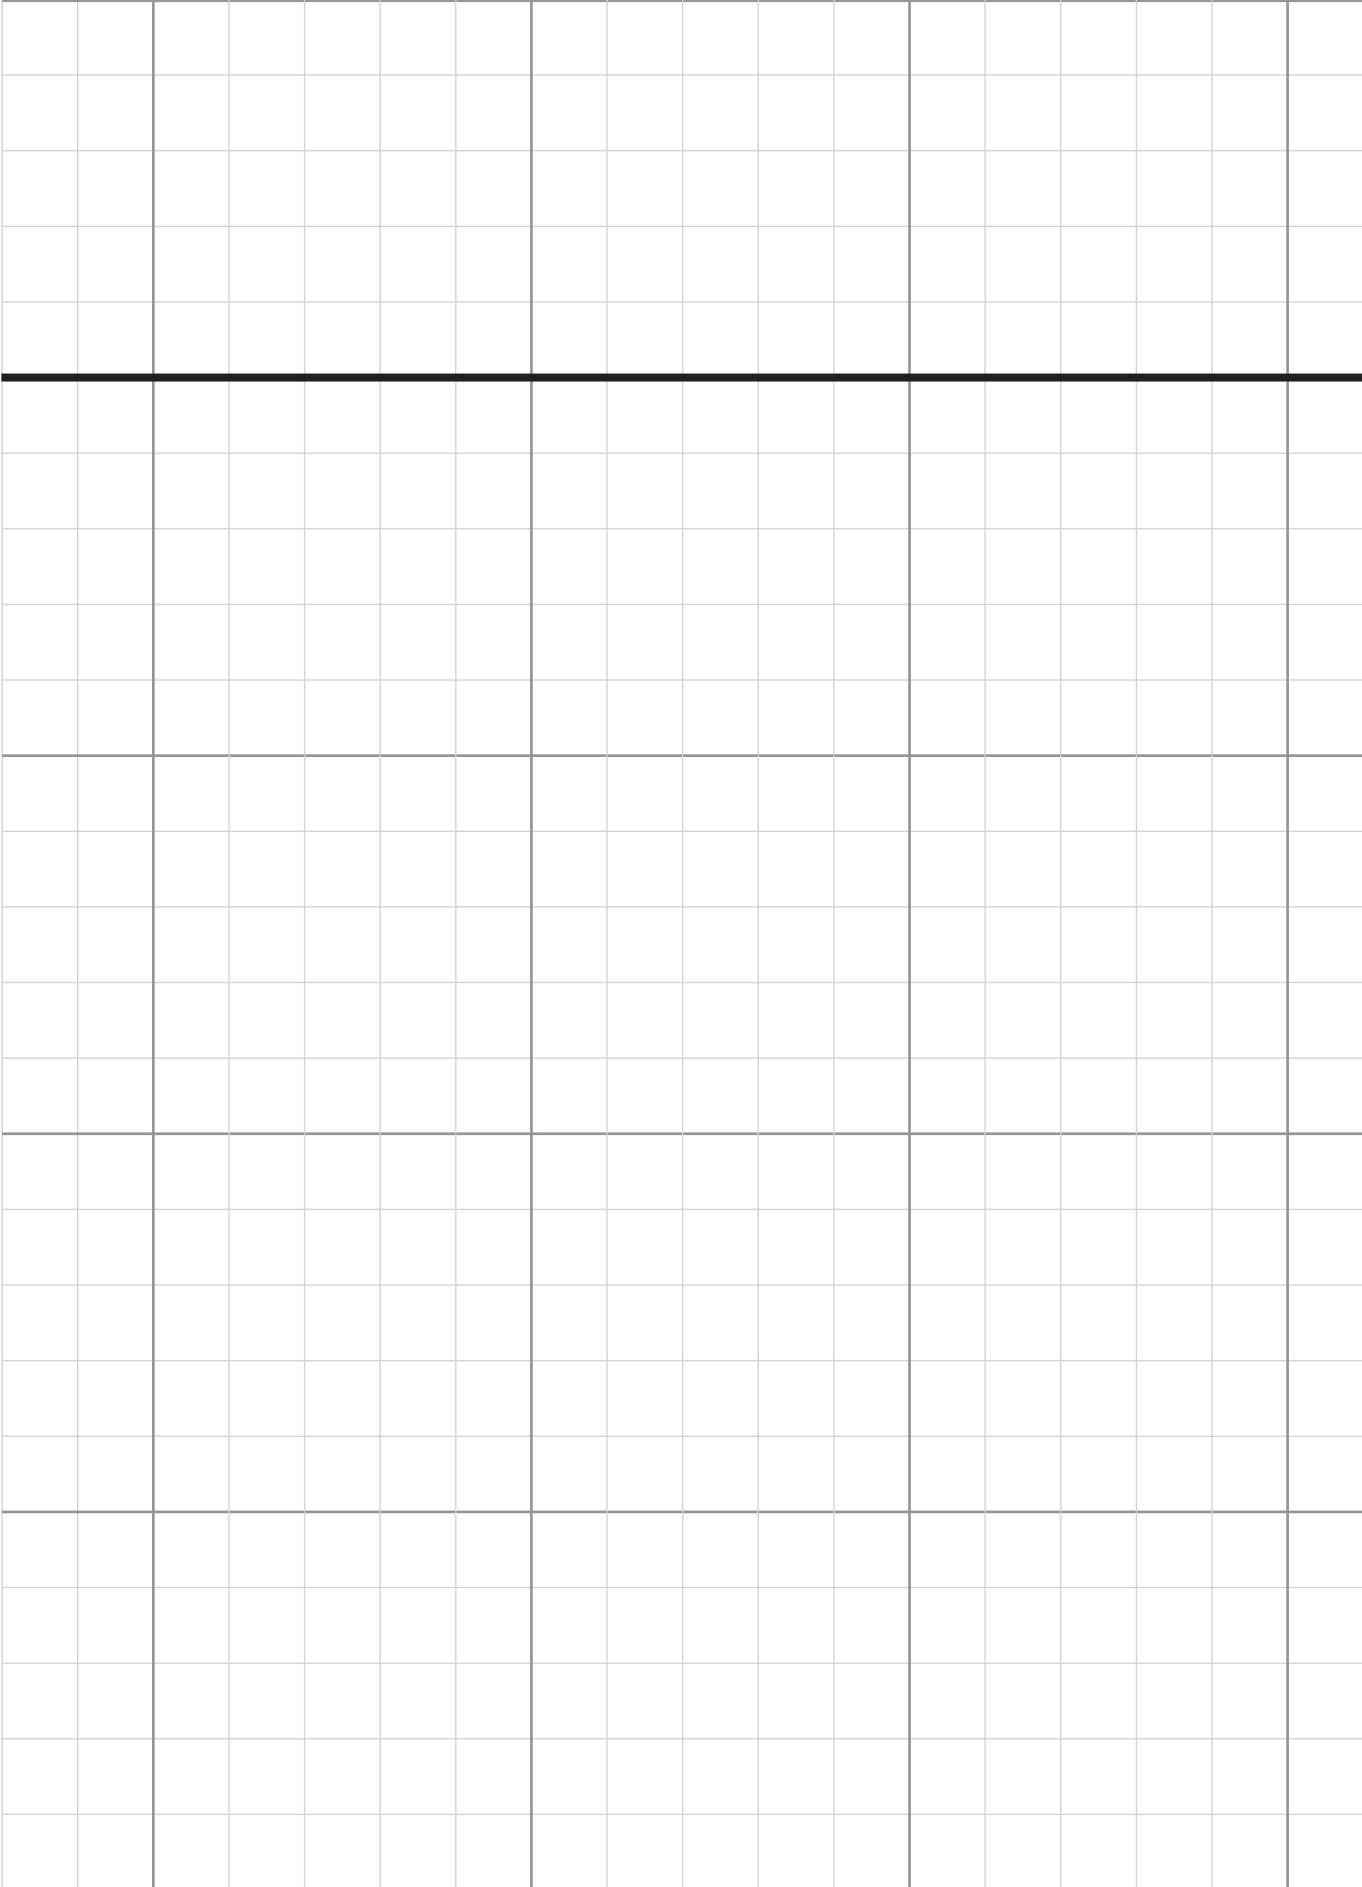

B. Lay out the A4 pages and match up the corners of each page with the corresponding numbers on the other pages. Once matched up with all their adjoining pages, trim each page along the crop marks with your ruler and craft knife, then tape the pages together. Repeat to attach any additional pages.

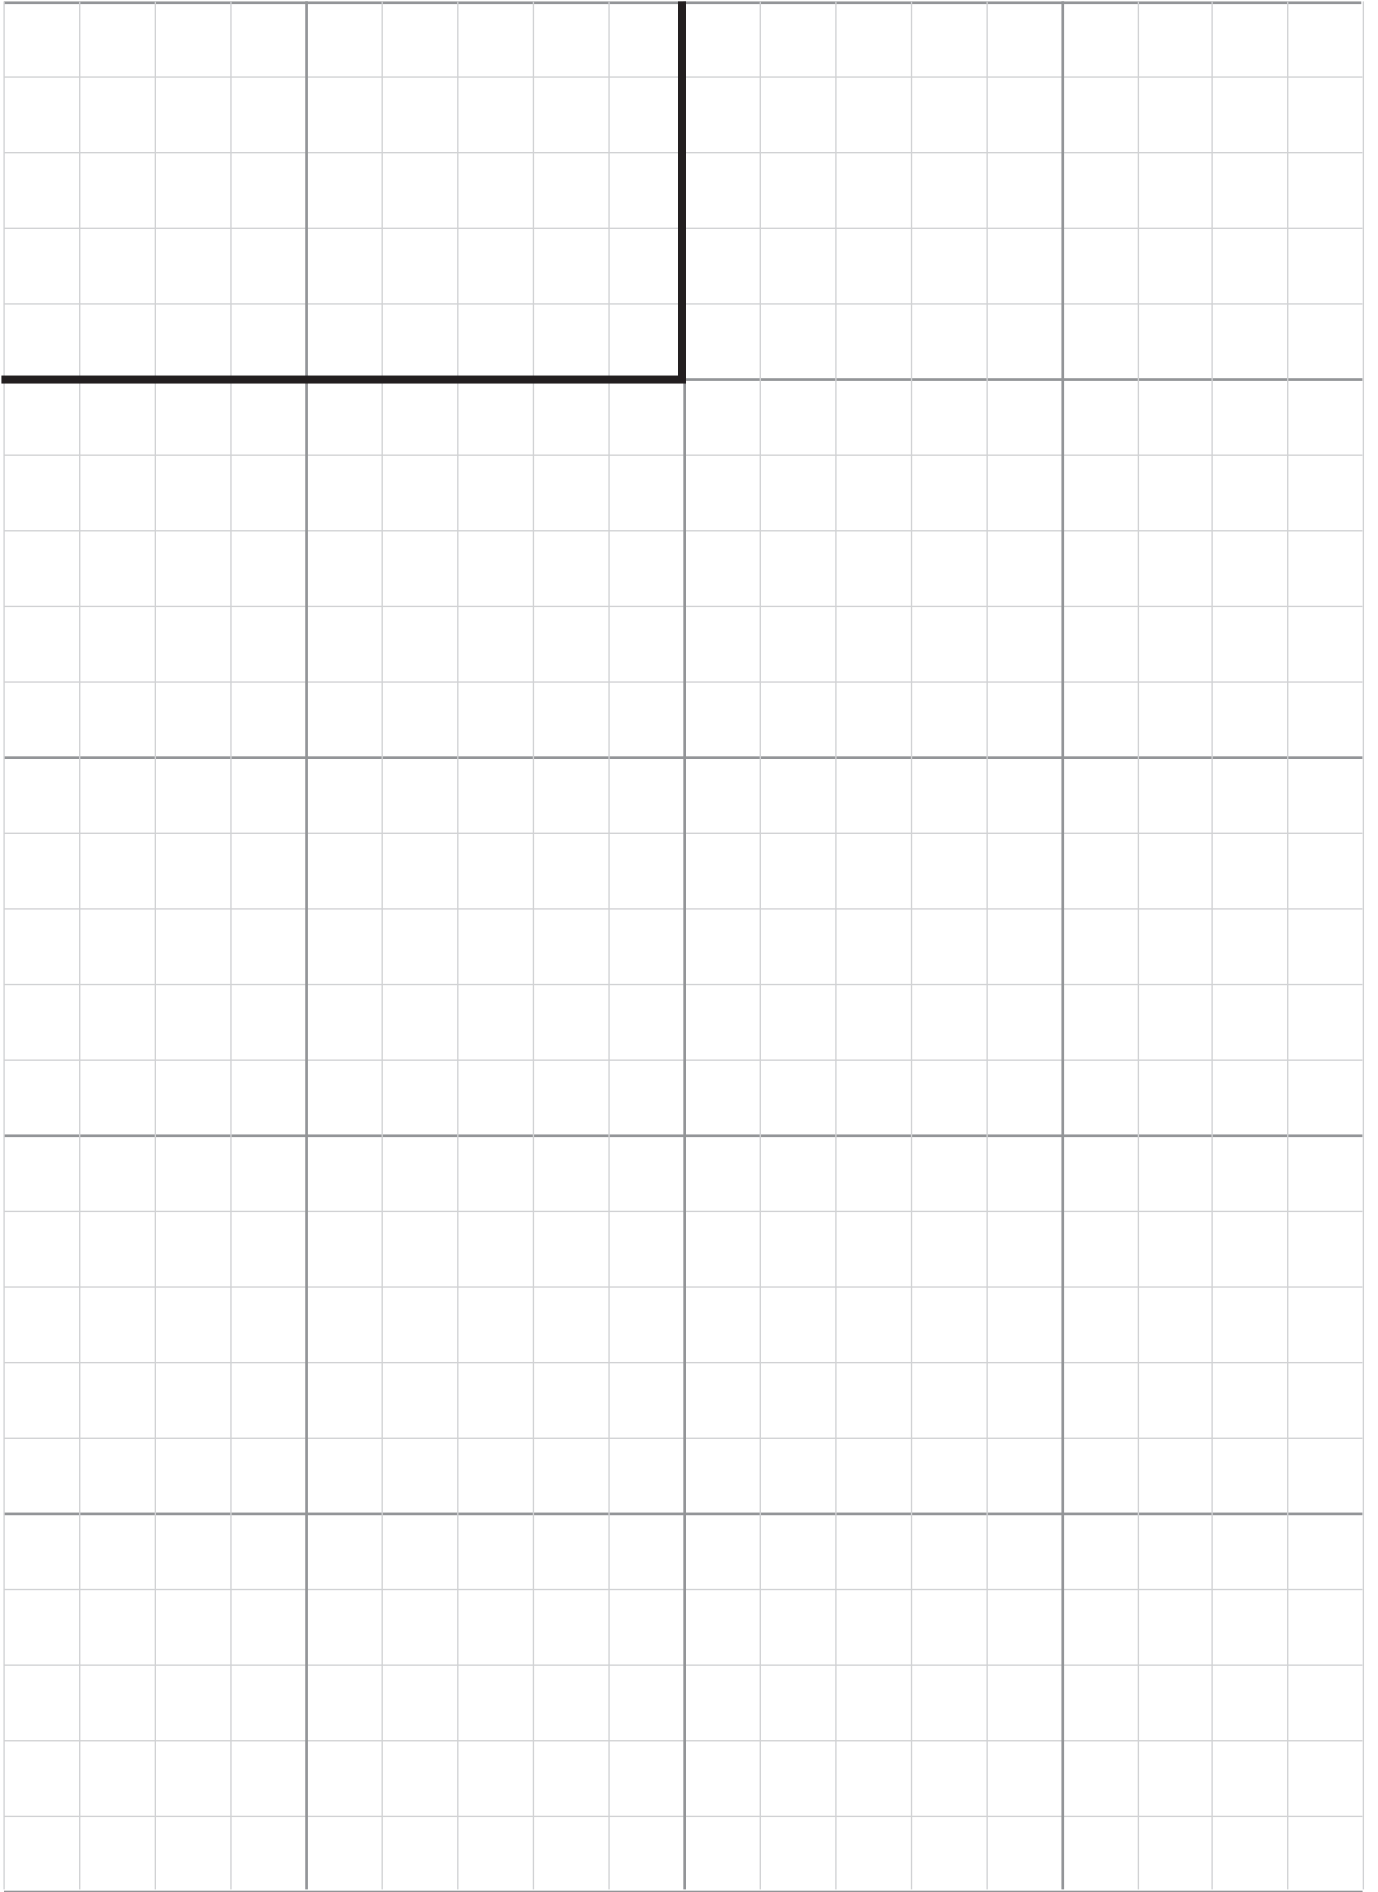

2

The image shows a grid with a thick border on the top and left sides. A vertical line runs down the center of the grid, separating it into two equal halves. The grid consists of 20 columns and 20 rows. The thick border is 2 units wide on the top and 1 unit wide on the left. The vertical line is 1 unit wide. The grid is otherwise empty.
