Downloading and piecing together all of the pattern pieces

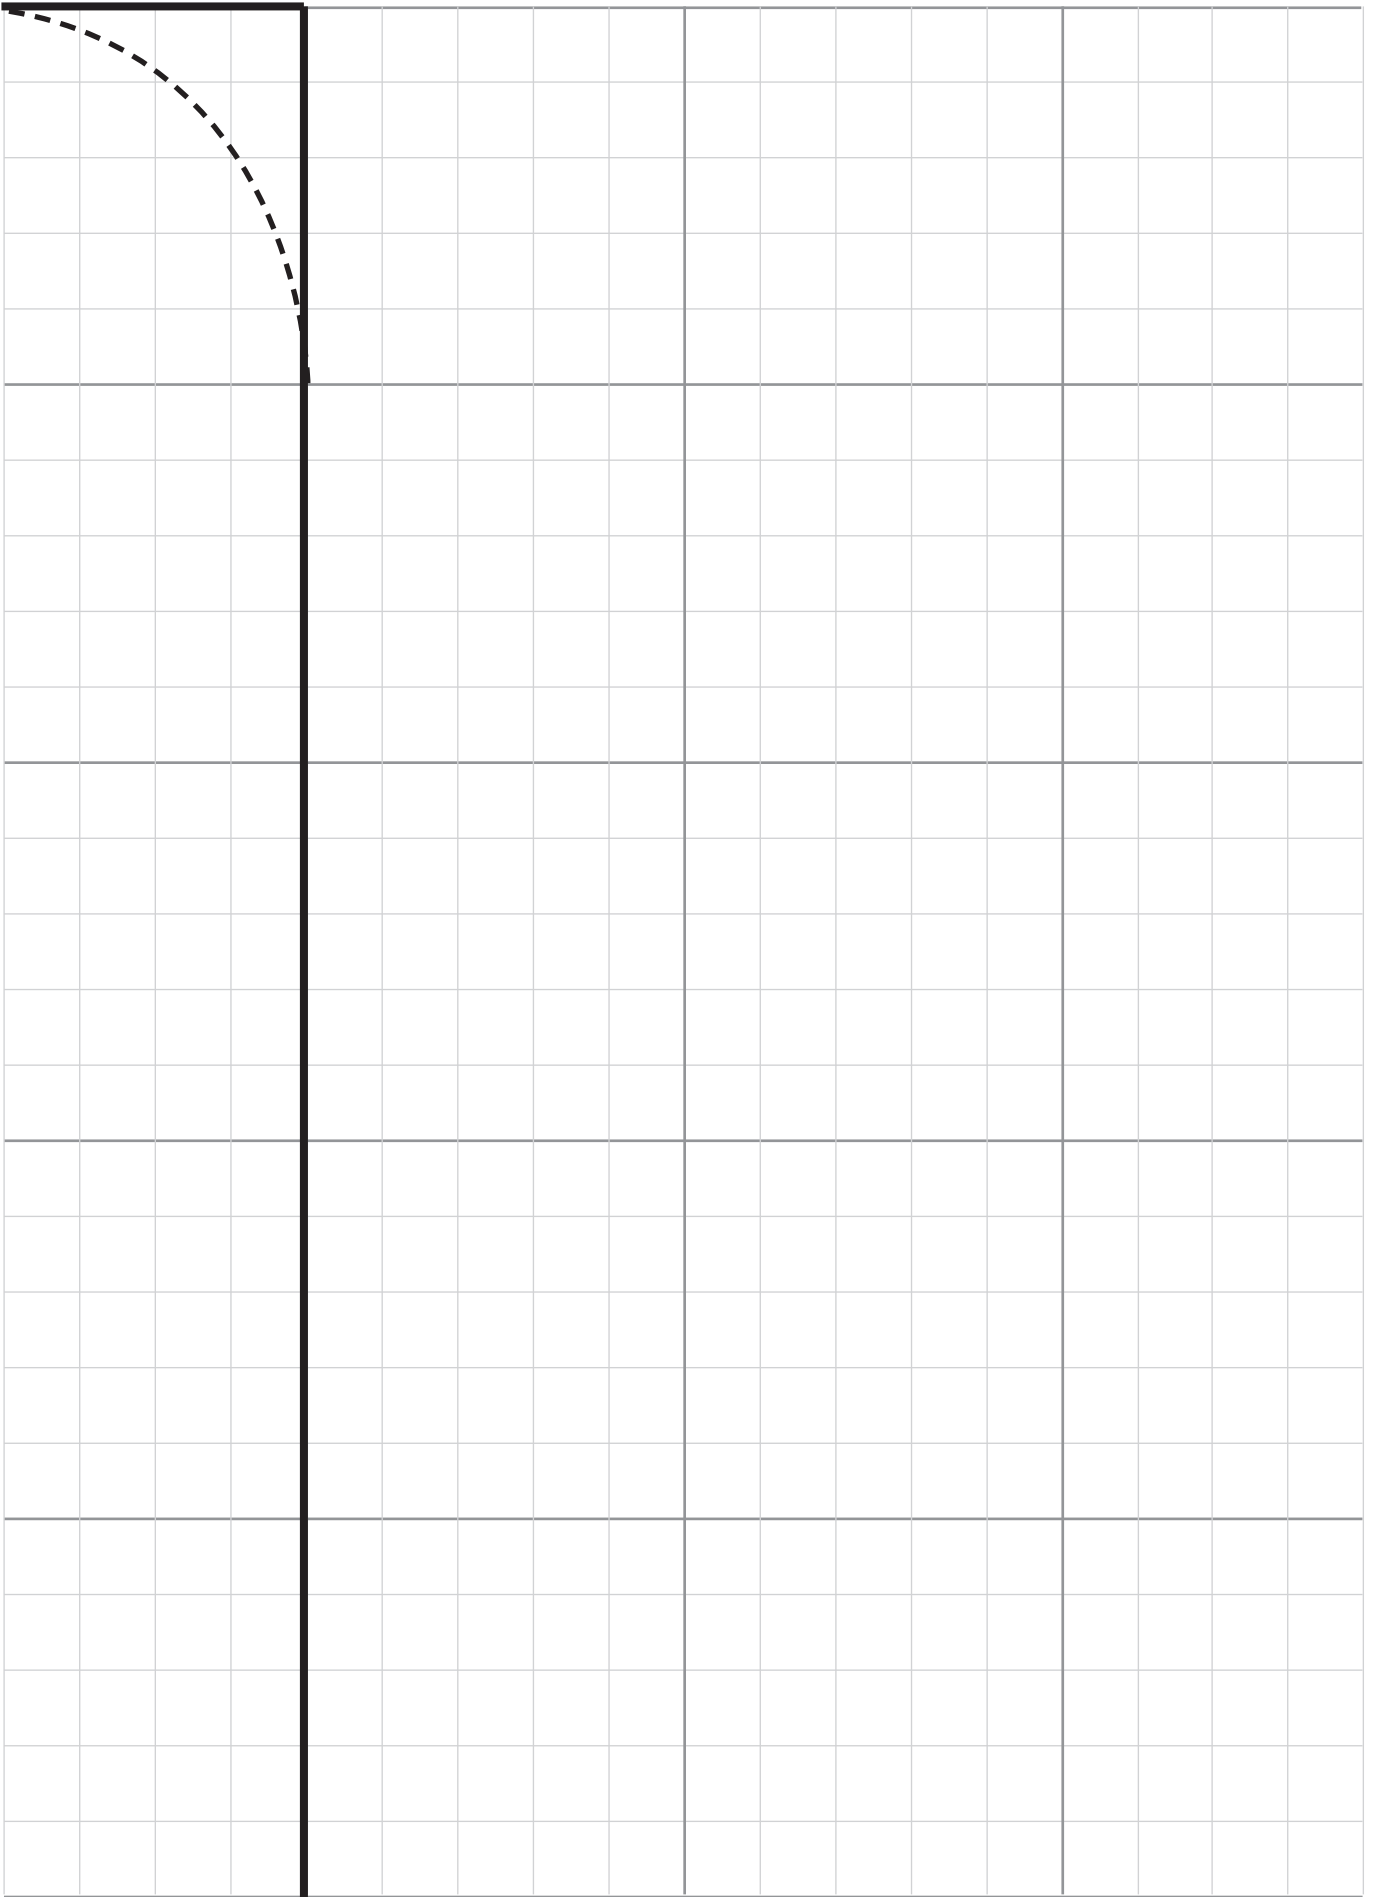

A. Print out all of the pattern pages onto separate sheets of A4 paper. The individual pattern templates are too large to print on a single sheet of A4 paper. See the instructions below on how to piece them together.

B. Lay out the A4 pages and match up the corners of each page with the corresponding numbers on the other pages. Once matched up with all their adjoining pages, trim each page along the crop marks with your ruler and craft knife, then tape the pages together. Repeat to attach any additional pages.

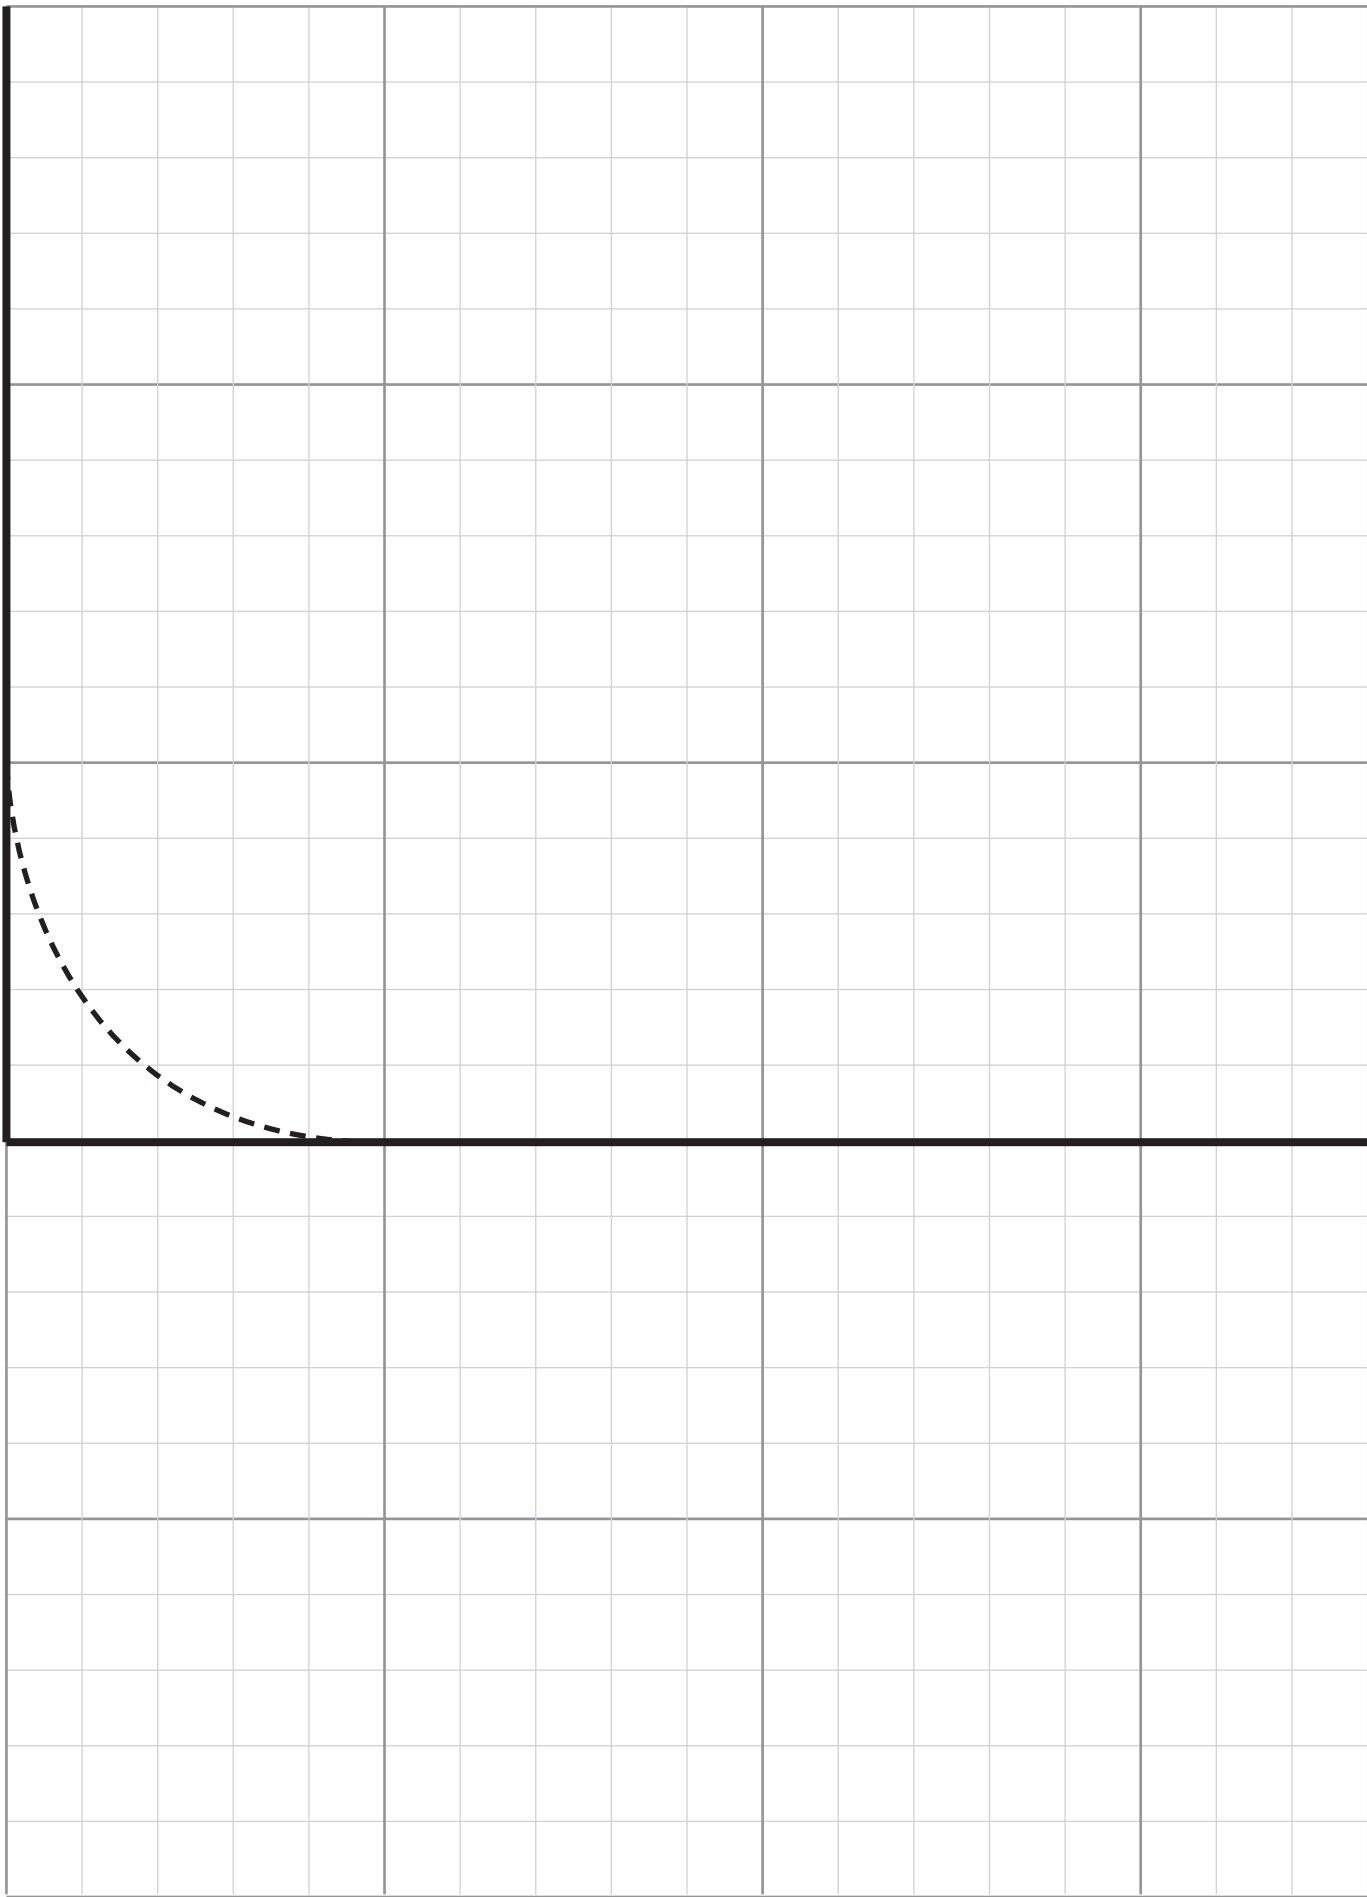

This image shows a large grid table. The grid is composed of 18 columns and 40 rows. The grid is divided into four 9x9 sections by thick horizontal and vertical lines. The top-left and bottom-right corners of the grid are marked with circled numbers 1 and 2, respectively. The bottom-left and top-right corners of the grid are marked with circled numbers 3 and 4, respectively.
